Background

Since April 2004, we have been located on the ground floor of a 140 year old building at the heart of Bluffton Village's picturesque, thriving downtown.

We wanted our shop to be warm, spacious, well lit, and friendly to all. A place where you could watch the long-arming, peruse “Raggedy” Ruth’s designs and ask questions. We feel we have achieved our dreams. We trust that we’ll help you achieve your dreams, too.

Home Of Raggedy Ruth Designs™

Our shop is well known as the home of *Raggedy Ruth Designs™* studio. A simple walk in the door will present you with displays of many of her sample quilts. Come by and take a look!

Ruth has over 150 patterns, 3 books and two tools. The patterns are sold individually, or as Block Of the Month and Shop Hop programs.

Ruth’s patterns and books are unique, well-illustrated, and understandable, often with quilt finishing instructions for multiple quilt sizes.

Her designs can be seen in our shop or in our web-store. They are nationally sold through other quilt shops and distributors.

More information can be obtained on our web-site at www.RaggedyRuthDesigns.com.

Home Of The *Perfect Corner Ruler™*

Ruth also invented the [Perfect Corner Ruler™](#) and [Perfect Corner Method™](#). These are used to create accurate 90° corner triangles.

This ruler is different because it has no seam allowances, the measurements start from zero at the corners, and there is a column that eliminates any need for arithmetic.

This technique overcomes the inaccuracies and waste of **all** other techniques. This approach works for all block shapes and configurations including: snowballs, square in a square, flying geese, triangle on a triangle, star points, and more.

It created blocks of the proper size so that:

1. Points of stars and blocks are not cut off;
2. Lines and designs are correct as the patterns intended;
3. Less fabric is used in creating the blocks as one corner square creates two corner triangles.

It was designed to be able to be substituted for the old “sew and flip” technique so that special patterns do not need to be purchased.

More information can be obtained on our web-site at the [Perfect Corner Ruler™](#) tab at www.ForeverInStitches.com or from our helpful quilting professionals in the shop.

Award-Winning Longarm Quilting Services

We quilt 600 customer quilts per year - and we've been doing that for fourteen years. The quilting required by our clientele ranges from basting to edge to edge [E2E] to highly custom quilting. Our clientele range from individual quilters to quilt shops to custom interior decorators.

We have two long-arm Statler Stitcher™ / Gammill™ Optimum machines. We can quilt items up to 12 feet wide and over 15 yards long down to items that are just a few inches. We can satisfy your quilting needs from a small table runner to a king bedspread or home decorator items.

Our equipment gives us the ability to provide the maximum flexibility for your quilting needs. Our automated stitching is so exact that it excels at intricate designs, and allows you to choose the designs and the layout of your quilt to accent your quilt top.

The automation lets you know what your quilt will look like, without relying on the artistic talent, or the lack thereof, of the particular quilter that works on your quilt.

We have over 5,000 patterns ready for your quilt, 1,500 of which were designed by us. We can also create additional patterns in-house as needed or we can obtain designs from other designers, as required.

When combined with our large choice of thread, from invisible, solid, or variegated, we can achieve many different effects, including incredible stitching that does not detract from your quilt, while at the same time, adding another dimension of beauty.

Call us to schedule an appointment with our qualified personnel to review and check-in your quilting project. Also, call or go to our web-site to receive our [Longarm Brochure](#) that explains the pricing and process in detail.

Extra-Wide Backing Fabric

We carry a diverse selection of 70 bolts of extra-wide back cotton fabric. The sizes range from 60" to 118" in width in order to avoid having seams in the backs. Seams in the backing can cause the rollers on quilting machines to have high and low areas as well as create differences in the elasticity which can cause unintended consequences.

Batting

We carry high quality batting from Quilter's Dream Company. We chose their batting because of its unsurpassed quality and uniformity. Batting is available in numerous thicknesses of polyester and cotton. We cut the batting from the roll to your order so that the price and waste are less. Additional sizes, thicknesses, colors, and materials can be obtained within a week.

Raggedy Ruth Designs™ ~ Patterns, Books & Tools

Books and patterns are "Idea Central" for quilting. Come, browse this constantly updated area. *Raggedy Ruth Designs*™ has over 150 patterns, three books, and two tools for your quilting desires and endeavors.

Our Web-Site & Facebook

Visit us at www.ForeverInStitches.com. Our site is updated weekly. Check here for the newsletters linked to [Facebook](#), new patterns ~ All The Latest Information. We also have a [Facebook](#) page that has all of our newsletters.

In our [web-store](#) you can purchase our products as well as get instructions on submitting your quilt top in person or by mail.

Digitized Stitching Designs

While meeting our customers' needs, requests from other longarmers, as well as our own artistic, we have developed over 1,500 of our own digitized stitching designs. As long as a quilting machine is automated and accepts QLI or DXF formats, our patterns will most likely work for you.

Our [design brochure](#) can be found on our [web-site](#). We sell these designs to other longarmers, distributors, and manufacturers.
