Hours – Eastern Time Zone

Daily10:00 a.m. – 5:30 p.m.
Closed For Lunch 1:00 p.m. – 2:00 p.m.
Saturday 10:00 a.m. – 1:00 p.m.
Sunday Closed

We are located 1.1 miles from either exits 140 or 142 on i-75 just 5 miles north of the junction of I-75 & US 30. Our entrance is at the rear of 120 N. Main St. off the Village parking lot east of N. Main St.

Background

Since April 2004, we have been located on the ground floor of a 140 year old building at the heart of Bluffton Village's picturesque, thriving downtown. We wanted our shop to be warm, spacious, well lit, and friendly to all. A place where you could watch the longarming, peruse "Raggedy" Ruth's designs and ask questions. We feel we have achieved our dreams. We trust that we'll help you achieve your dreams, too.

Our shop is well known as the home of **Raggedy Ruth Designs™** studio. A simple walk in the door will present

you with displays of many of her sample quilts. Come by and take a look! The view is spectacular with over 80 of Ruth's one-of-a-kind designs hanging on the walls!

Ruth has over 150 patterns, three books and two tools. The patterns are sold individually, or as Block Of the Month and Shop Hop programs.

Ruth's patterns and books are unique, well-illustrated, and understandable, often with quilt finishing instructions for multiple quilt sizes.

Her designs can be seen and perused in our shop or on our on-line [web-store](http://www.ForeverInStitches.com). They are nationally sold through other quilt shops and distributors. More information can be obtained from our web-site at www.ForeverInStitches.com.

Ruth also invented the **Perfect Corner Ruler™** and **Perfect Corner Method™**. These are used to piece accurate 90° corner triangles while saving fabric.

It was designed to be substituted for the old "sew and flip" technique so that special patterns do not need to be purchased.

This ruler is different because it has no seam allowances, the measurements start from zero at the corners, and there is a column that eliminates any need for arithmetic.

This technique overcomes the inaccuracies and waste of **all** other techniques. This approach works for all block shapes and configurations including: snowballs, square in a square, flying geese, triangle on a triangle, star points, and more.

It created blocks of the proper size so that:

1. Points of stars and blocks are not cut off;
2. Lines and designs are correct as the patterns intended;
3. Less fabric is used in creating the blocks as one corner square creates two corner triangles.

More information can be obtained on our web-site at the [Perfect Corner Ruler™](http://www.ForeverInStitches.com) tab at www.ForeverInStitches.com or from our helpful quilting professionals in the shop.

Award-Winning Services

We quilt 600 customer quilts per year - and we've been doing that for fourteen years. The quilting required by our clientele ranges from basting to edge to edge [E2E] to highly custom quilting. Our clientele range from individual quilters to quilt shops to custom interior decorators.

We have two Innova 26" AutoPilot Mach3™ machines. We can quilt items up to 12 feet wide and over 15 yards long. We can satisfy your quilting needs from a small candle mat to a California king bedspread or home decorator items.

We have the ability to provide the maximum flexibility for your quilting needs. Our automated stitching excels at intricate designs, and allows you to choose the designs and the layout of your quilt to accent your quilt top.

We have over 5,000 patterns ready for your quilt, 1,500 of which were designed by us. We can also create additional patterns in-house as needed or we can obtain designs from other designers for you, as required.

When combined with our large choice of thread, from invisible, to solid, or variegated, we can achieve many different effects, including incredible stitching that does not detract from your quilt, while at the same time, adding another dimension of beauty.

Call us to schedule an appointment with our qualified personnel to review and check-in your quilting project. Also, call or go to our web-site to receive our [Longarm Brochure](#) that explains the pricing and process in detail.

We Are Your Innova Dealer

We are proud to be an [Innova dealer](#) for the entire line of products from sit-down desks to the largest stand-up models. Innova is "Built To Quilt" from the smallest detail of design to the end result of your quilting.

The scalable Innova designs mean that you can start small and grow with your capabilities

and needs using your original equipment! Each size of mid- to long-arm sew-head [18", 22", 26", 32"], can be upgraded from free-motion to AutoPilot Mach3™ and all points in between. Your only up-front decision is the size of the sew-head, which determines the size of the patterns and designs that you can sew.

You can start with the table model where you can sit and move the fabric just like on your sewing machine, but with a great throat size! The next steps are stitch regulation, Lightning Stitch™, Pantovision™, Navigator™, and AutoPilot Mach3™ - any step from table sewing, through free motion, to full automation enhanced longarming.

The same scalability is true of the tables, to a slightly lesser extent. Tables can be changed from 5', 6', 8', 10', 12', to 14' by only changing a few items such as the rollers. The sit-down 18" model's desk, will have to be replaced to change to the stand-up configuration, although the original sew-head can be used and upgraded with new features from free-motion to the highest level of automation, as your requirements change.

18" Innova

22" Innova

26" Innova

32" Innova

18" Sitdown Innova

So, whether you are a hobbyist, a professional, or operate a longarming service, you can find an Innova to fit your needs from the 18" Sit-Down for under \$7,000 to a 26" AutoPilot Mach 3™ for \$38,000. That is a huge range in prices, but an even larger range in capabilities.

Suffice it to say that matching your desires with the capabilities of the machines, while taking into account any changes in your desires as you progress, is what is important. We can assist you through the choices to fit your needs when you call us.

Extra-Wide Backing Fabric

We carry a diverse selection of over 80 bolts of extra-wide back cotton fabric. The sizes range from 60" to 118" in width. This allows you to avoid having seams in the backs that can distort your quilt and can cause unintended consequences during the longarming process.

Batting

We carry high quality batting from Quilter's Dream Company. We chose their batting because of its unsurpassed quality and uniformity. Batting is available in numerous thicknesses of polyester and cotton. We cut the batting from the roll to your order so that the price and waste are less. Additional sizes, thicknesses, colors, and fibers (wool, silk, bamboo, etc.) can be obtained within a week.

Patterns, Books & Tools

Books and patterns are "Idea Central" for quilting. Come, browse this constantly up-

dated area. [Raggedy Ruth Designs™](#) has over 150 patterns, three books, and two tools for your quilting desires and endeavors.

Our Web-Site & Facebook

Visit us at www.ForeverInStitches.com. Our site is updated at least weekly. It has a page that has all of our newsletters. We also have an up-to-date [Facebook](#) page.

In our [web-store](#) you can purchase our products, peruse our patterns, as well as get instructions on submitting your quilt top in person or by mail.

Digitized Stitching Designs

While meeting our customers' needs, requests from other longarmers, as well as our own artistic needs, we have developed over 1,500 digitized stitching designs. As long as a quilting machine is automated and accepts PAT [Innova], QLI or DXF formats, our designs will most likely work for you.

Designs are sold in groups to lower their cost to you. Pictures of the designs can be found on our [web-site](#) in html format.

Subject to change without notice.
